

PRODUCT INFORMATION

The HV Bucket Liners have been manufactured to fit inside the fibreglass buckets of trucks designed for live-line work. Fully ribbed for toughness, radiused corners for additional strength, and moulded-in steps for easy access. Each liner tested to ANSI/SIA 92.2–2001 standard.

FEATURES

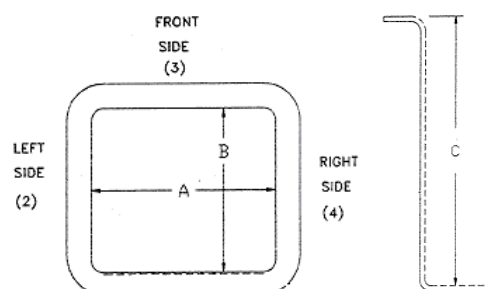

- Fully ribbed for toughness
- Radiused corners for additional strength
- X2 moulded-in steps for easy access
- Tested to ANSI/SIA 92.2–2001 standard for safety

HOW TO MEASURE YOUR BUCKET

- A - The distance from the inside left side of the bucket to the inside right side of the bucket at the top of the bucket.
- B - The distance from the inside of the front side of the bucket to the inside of the back side of the bucket.
- C - The distance from the inside bottom of the bucket to top of the lip.

For best fit, A & B need to be 10–50mm smaller than your bucket measurement.

C must be 10mm or more, larger than your bucket measurement.

PRODUCT SKU'S

SKU	PRODUCT	WIDTH & DEPTH (A X B)	HEIGHT (C)
207000	LIVE LINER SH136 (made to order)	1176 x 694mm	1007mm
207001	LIVE LINER SH138 (available ex-stock)	1085 x 709mm	1010mm
207006	LIVE LINER 138XL (made to order)	1085 x 715mm	1105mm
207003	LIVE LINER SH140 (made to order)	971 x 699mm	996mm
207004	LIVE LINER SH145 (made to order)	1024 x 718mm	930mm
